

# *Living Embryos*

**8-9 OCTOBER 2022**

*...a biodynamic view  
of the forces of growth and  
development throughout life'*

## **Covid-19: Safety guidance during the Biobasics weekend**

As we learn to live safely with Covid 19, there are actions we can take to help reduce the risk of catching and spreading covid 19 and other respiratory infections.

If you have any symptoms of a respiratory illness or feel unwell please do not attend. Having a negative lateral flow test before attending would be preferable but is not compulsory.

People in serious vulnerable categories cannot be guaranteed safety in this setting and should assess if this is an appropriate risk they should take .

Regular hand washing / sanitising is encouraged.

Please be prepared to wear a mask if someone in your individual group needs you to, especially for the practicals .

We will try to ventilate the space as much as is possible.

We hope you understand why we are continuing with these measures and that they do not impact on your learning and enjoyment of the course. Should you have any questions or concerns about the course before it starts, please email [team@biobasics.c.uk](mailto:team@biobasics.c.uk) as soon as possible. If it's during the course then please speak to a member of the team.

We look forward to welcoming you,

**Hazel Williams, Julia Finlay, Ann Farthing and Giles Cleghorn**

**BioBasics UK, St. Charles Catholic Sixth Form College, St. Charles Square London W10 6EY [biobasics.co.uk](http://biobasics.co.uk)**
